Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25, drawn to a manipulator, classified in class 74, subclass 490.05.
 - II. Claims 26-28, drawn to a method of assembling a test head for use with a manipulator, classified in class 29, subclass 428+.
2. It is noted that the claims are incorrectly numbered because they do not include claims 26-29, and therefore claims 30-32 have been renumbered as claims 26-28.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of claims 1 and 19 can be made with a materially different process, such as the test head can be fastened to only one side of the stiffener and not on both sides of the stiffener as defined by claim 26.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3682

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
